SUMMARY

Full Stack Engineer with almost 2 years of professional experience building production web and mobile applications with React/Next.js and .NET (C#). Independently designed, built, and deployed a SaaS multi-tenancy web app (Kasa POS) with a companion mobile app for POS transactions and a PWA for admin management, taken from concept to live production in under 2 months for a paying client. Comfortable owning features end-to-end, from architecture and data modeling through deployment and post-launch support.

PROFESSIONAL EXPERIENCE

Full Stack Developer — RePoint Solutions Inc.

2025 – 2026

- Contributed to four production applications across web and mobile as part of a small cross-functional team, including a superapp (Helps Innovation) live on Google Play and App Store, using React, React Native, TypeScript, Next.js, and SignalR.
- Implemented real-time order status syncing via SignalR across admin, vendor, and customer roles, and resolved a payment gateway race condition (iCore integration) that was causing order and payment state mismatches.
- Built customer, vendor, and admin features for Helps Innovation, a multi-role platform combining emergency response coordination with food delivery and vendor management, plus companion React Native apps (Helps Innovation Mobile) for customers, riders, and vendors.
- Built frontend features for Neuropoint, a learning management system, and Careerpoint, a career recruitment platform, using React, Next.js, and Redux Toolkit.
- Designed and maintained MySQL database schemas and queries supporting core application workflows.

PERSONAL PROJECTS

Kasa POS — *SaaS multi-tenancy web app with a mobile app for POS transactions and a PWA for admin management* ·
Independently built and deployed to a live paying client

- Independently designed, built, and deployed a full-stack POS system in under 7 weeks (May–June 2026): Next.js PWA frontend and a .NET backend using Clean Architecture, CQRS, MediatR, and EF Core.
- Implemented offline-first sync, PIN-based cashier authentication, shift management with cash reconciliation, and role-based access with multi-tenant-ready architecture.
- Built mobile cashiering with Bluetooth receipt printing and barcode scanning, inventory tracking with low-stock alerts, and deployed as a self-contained .NET service with SQLite to a client's production machine.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, React Native, Tailwind CSS, TanStack Query, Zod

Backend: C# / .NET (Clean Architecture, CQRS, MediatR, EF Core), REST API design, PHP (Laravel), Node.js (Next.js ecosystem)

Database: MySQL, SQLite, PostgreSQL

Tools & Practice: Git, Docker, Figma (UI implementation), CI/CD (GitHub Actions), Agile/Scrum, Jira, Postman, unit testing (Cypress)

EDUCATION

BS in Information Technology — Tagoloan Community College

2020 – 2025
